

Using Sphero to Teach Programming Fundamentals Basketball Court Construction

Construction

- 1. Grab a 24 in. x 48 in. black chalkboard.
- 2. Screw four 1 in. x 3 in. x 24 in. wood planks along the base of the chalk board to provide stability
 - Screw down through the chalk board into the wood planks
 - Planks should be evenly spaced apart
- 3. Grab 12 ft. foam pipe insulation
- 4. Cut along the foam pipe insulation
- 5. Wrap the insulation along the border of the chalk board
- 6. Screw the insulation along the side of the chalkboard.
- 7. Draw general shape of a basketball court onto the chalkboard

Top of Board

Bottom of Board

Basket Construction

- 1. Buy a Sphero ramp
- 2. Buy a 6 in. x 8 in. aquarium fish net
- 3. Cut off the handle of the fishnet
- 4. Use duct tape to attach the fish net to the ramp
